PROSPECTUS. THE Principal object of the Company is to provide a regular SUPPLY of PURE MILK of the BEST QUALITY at a MODERATE PRICE.

From a hygienic point of view a goo Milk supply is of the greatest importance, and the totally inadequate supply in this Colony hitherto has become a matter of serious consideration to its community. Dairy Farming has been carried on in-Shanghai, Amoy, and Japan with great

success, both as regards the satisfaction af-535 forded to consumers and the profits realized. The Company will offer to the Public besides Milk, other Dairs produce, such as Fresh BUTTER, CREAM, &c.

An Estate comprising 23 acres situated at Pokfoolum admirably suited to the purposes of a DAIRY FARM, with easy means of transport both by road and water has been secured for a term of years. It is proposed to import about 100 MILCH COWS at once and it is hoped that the Dairy will be in operation by the and of May. The Directors have in view a competent and experi-

enced Manager. A scheme has been formulated for separating the herds of cattle, which will almost entirely do away with the chance of any

severe loss by disease. The only Contract which has been enter: ed into is an Agreement of Lease of the premises at Pokfoolum above referred to, COLOT and dated the 11th day of February, 1886, and made between Agostinho Guilherme Ro-MANO, JOSE MARIA EVARISTO MACHADO, and Demerrio Antonio Des Remedies of the one part, and the Hon. REUTER'S telegram is not a little startling; but the expropriation of the Irish landlords by means of a fund of £200,000,000 may not seem to be so chimerical when it is borne in mind that in 1880 the acreage of Ireland, taken at £21 per acre (or thirty years' purchase) was valued at £420,000,000. The hugeness of this scheme, however, may well make Ministers pause and pender over the question as to the fit and proper power to administer a fund of such magnitude.

According to his account, a few strangers who had gone to Sungkong to pass their examinations went last Wednesday into the Roman Catholio Church compound, and wanted to pluck some flowers. They were prevented, and taking offence at this they went away, collected their friends, and me turned, then broke into the houses in the Church compound, dragged out the furni ture, smashed it, piled it up into a heap, and set fire to it; the Christian occupants of the houses having meanwhile all run away and hidden themselves. Fortunately before the year had far advanced these fears were dispelled by the treaty of peace; and a war, which was commenced, I believe, in a great measure through accidental mis understanding and was due to a considerable amount of ignorance, was happily brought to an end. That treaty of peace cannot but affect very materially the interests of this There is a further treaty now process of negotiation, which it will be the duty of the Chamber to watch the terms of with care, and it is to be hoped when that treaty is signed and before us, that we shall find in it much to epprove and that we may consider that it will redound to the advantage of this Colony by increasing intersourse with the Southern portion of China. and let us hope it will in not too exclusive a managr provide only for the advantage of the French people. Whatever the advantage may be that that treaty gives in the way of frontier provinces to France, I think it should be the effort of the Chamber to take care that this Colony shall also enjoy it through the water ways of the neighbouring provinces. Whatever advantage France may possess between Tonkin and China. I think that the water courses of the South should also be enabled to Before leaving the subject of war, I think it well to remark upon what occurs to me to be the advantage to itself which China obtained by that war. It strikes me that nothing that has occurr during the last quarter of a century has done more to make China a nation, to produce a patriotic feeling among her vast population, to bring into harmony the ideas of the West with those of China in the way of progress. And we have seen already the development that has taken place in telegraphic communication. We must hope that the experience of China from the telegraph will be seen by and bye in the greater wide of China. Mr MacEwen-Mr Chairman, with re ference to the remarks you have made regarding the proposed direct telegraphic communication between Hongkong and Singapore, I am somewhat disappointed that you were not able to take a more hopeful view of what to my mind most important matter. Well, Sir, after reading that letter I put myself in communication with Mr Durran, the agent of the Eastern Extension Telegraph Co. here, who was most courteous last year in giving general information to this Chamber. He very kindly said he would communicate with his Board Drectors at home, with a view to see whether some further reduction in the subside could not be obtained; and a few days after, I received the following letter :-

Now, Sir, I would like to draw your attention to one other matter, and my excuse for doing so is that this is the only opportunity a member of the public has of drawing official attention to matters which are of municipal interest in this Colony; and that is sanitation and the Sanitary Board. Of late years great amount of general dissatisfaction, has been expressed at the Sanitary Board of this Colony, Complaints are frequently being made, and they recoive I may say but little attention, in fact it is not in some instances, until the vitiated atmosphere of polluted districts has entered the hearths and homes of many householders in this Colony and caused sad and irretrievable havon that this precious Sanitary Board wakes up to a sense of its responsibilities and duties and effects the repairs absolutely necessary.
